# About Experia Energy

EXPERIA ENERGY SERVICES Limited is a Nigerian Private Limited liability Company registered under the Companies Acts of 1990, in line with the policies of the Corporate Affairs Commission [C.A.C.] of Nigeria. The company's core area of operation is providing broad spectra of services, which include:

- **Flowline/Pipeline Construction & Repairs**
- **Wellhead Installation & Maintenance**
- **Corrosion Control**
- **Facility Maintenance & Upgrade**
- **Procurement,**
- **Hot-Tap/Stopple Operations,**
- **Manpower Supply**
- **Civil & Structural Works**
- **Equipment Leasing**

EXPERIA ENERGY SERVICES LTD has rich local content policies, which ensure we conform to very high professional and ethical standards. We have developed and maintain a Quality Management System that conforms to the requirements of **ISO 9001:2008**.

As a result, we have recorded NO Safety Incidences, have a robust relationship with our clients and host communities, while undertaking seemingly insurmountable projects in very difficult terrains.

With a strong financial capacity and a committed workforce, EXPERIA ENERGY executes projects – both major and ancillary with minimum delay.

Our Staff Hiring and Retention policies provides a safe and conducive environment for all workers. This has ensured that all personnel working with and around our installations are familiar with the Internationally accepted safety procedures and policies.

# Our Values

## **MISSION STATEMENT**

Delivering value-added services to our clients through innovative and customized solutions focused on the Energy, Construction, Power, Oil & Gas industries.

## **VISION STATEMENT**

Becoming the Best-in-class Service provider in the Nigerian Oil & Gas sector renowned for excellence in Equipment Supplies, Engineering, Procurement and Construction Projects as well as Marine Services using Best Available Technology and Best Available Resources.

## **TEAM / OPERATIONS**

Experia Energy Services Limited is blessed with an array of experienced employees in various fields.

## **OUR STANDARD**

We meet all international best practice quality standard by developing a system of monitoring all our projects to ensure compliance with each client's standard requirements and value for their money.

## **STRATEGIC PLANNING**

In keeping faith with our mission statement, EXPERIA ENERGY SERVICES LTD applies the following steps in its strategic planning:

- **Establishing accurate control measures in administration and operations.**
- **Convert her plans into action with qualitative reviews.**
- **Formulate strategic options and select appropriate strategies.**
- **Set goals and objectives for our different operational divisions.**
- **Appraising the strength and weakness of EXPERIA ENERGY SERVICES LTD with the aim to review and make adjustment.**

## QUALITY POLICY STATEMENT

- To supply our customers with services and products in accordance with their specific requirements with the respect of the safety rules and within the forecasted planning and budget,
- To maintain the quality level of our Company,
- To follow training and awareness of our personnel,
- To reduce disruption and to measure progress for a better safety and productivity, in order to improve Quality,
- To increase communication and information to obtain improved interfacing,

Are the on-going objectives of our Company.

**It is with a permanent and collective determination of purpose that we will fulfil these commitments.**

**EJIOFOR CHINONSO**  
Managing Director

### OUR VALUES

Our workers' health, safety and security on the workplace and preservation of the environment are our first and foremost concerns and duties.

### OUR OBJECTIVES

- To ensure security and physical integrity of personnel, everywhere they intervene,
- To eradicate hazardous situations in order to ensure safety of our personnel and others,
- Preserve health of men and women of the Group,
- To respect cultures and laws of countries in which we intervene,
- To prevent any harm to goods and environment.

### OUR POLICY

- To control particular risks related to each country and worksite by identifying, analyzing and assessing them, then by training our workers
- To control application on the field of prevention means and to measure efficiency
- To analyze any event this may detrimentally affect people's security, safety and health of our personnel, as well as environment in order to improve our dispositive
- To promote implication and exemplarity of our personnel
- To privilege, during our operations, partnerships with companies sharing the same values

### OUR COMMITMENT

I personally commit myself to implement, within our organization, the necessary means to defend our values and meet our objectives as part of our policy.

Through exemplary behaviour and faultless commitment, the company management is expected to apply our policy in the field.

I will personally ensure that everybody's commitments are respected.

It is with permanent, individual and collective determination that we will meet our objectives

# what we do

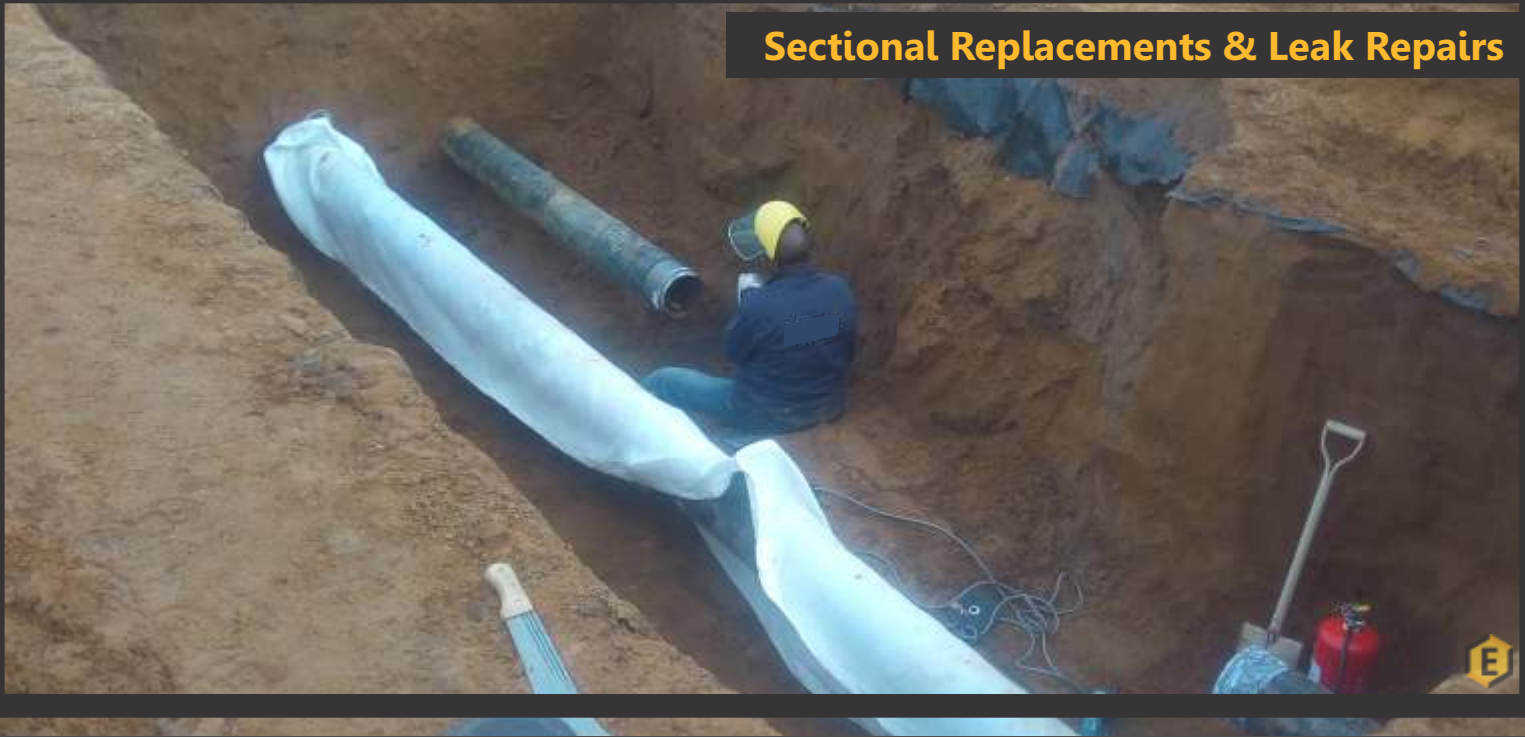

## Construction of Flowlines & Pipelines

Experia Energy Services Limited takes great pride in dedicating its expertise to major Flowline and Pipeline Construction projects (both on land and swamps), throughout the country and beyond.

## Sectional Replacements & Leak Repairs

We provide Sectional Replacement of Flowlines and Pipelines either on land or swamp areas.  
We also carry out leak repair on Pipelines and Flowlines, using different methods.

## Wellhead Installation & Maintenance

We have been engaged in Wellhead installation and maintenance projects for a long time, with trained professionals. Our expertise covers wellheads from various manufacturers in different types of locations.

Due to the high cost of procuring new wellheads, many of our clients prefer to refurbish existing heads. Our engineers are proficient in handling this refurbishment, which preserves the wellheads and optimizes their operation.

## Corrosion Control

Experia Energy has a team of NACE-certified corrosion control experts/inspectors to deliver prompt solutions for extending the lifespan of structural elements. We also provide cathodic protection services.

## Facility Maintenance & Upgrade

Our specialist services provide for optimization of Production Facilities, and we are able to simultaneously carry out our operations, thus minimizing shut down periods - even in live offshore production platforms.

Our seasoned expertise and strategy in foreign and local procurement optimize our client's processes, so as to remain productive, efficient and profitable.

We are specialists in the sourcing of Equipment and Spares such as Pipes, Valves, Pipe-Fittings, etc. We also have business relationship with well-known OEMs such as Delta Pacific Valves Manufacturing Company, National OilWell Varco [NOV], Wilden Pumps, etc

## Hot-Tap & Stopple Operations

Experia Energy has highly qualified personnel and pre-mobbed equipment to carry out Hot-Tap/Stopple Operations. Our procedures are in line with globally accepted standards.

# Manpower Supply
